Mohali, Punjab, India

JOB OBJECTIVE

Dynamic & resourceful professional targeting roles in **Full-stack Development | Front-end Development** to leverage expertise in building scalable, user-centric web applications and cloud-native solutions to drive innovation and deliver impactful digital experiences in a dynamic technology environment.

EDUCATION

2021: Bachelor of Technology in Computer Science from Punjab Technical University, Punjab

CORE COMPETENCIES

React.js Development
Micro Front-end Architecture
TypeScript & JavaScript Programming
State Management
Back-end Development
API Integration
Cloud Platforms & DevOps
Database Management
UI/UX Design & Frontend Styling
Payment Gateway Integration
Full Stack Development & Scalable Web Applications
Collaborative Agile Development & Cross-Functional Teamwork

TECHNICAL SKILLS

Front-end Technologies: React.js, Next.js, Vue.js, JavaScript, TypeScript, Redux, Chakra UI, React Query, React Native

Styling and UI Framework: HTML5, CSS3, Bootstrap, SCSS, Talwind css, Expressjs, React Query, Chakra UI

Back-end Technologies: Node.js, Nest.js, Express.js, RESTful APIs, GraphQL, Java Core, Hibernate, SprintBoot

DBMS: MongoDB, MySQL, Postgress

Operating Systems: WindowsXP7, MacOS, Linux, Ubantu

Source Control Systems: Git (Github, Gitlab, Bitbucket)

Cloud & DevOps: AWS, Azure, Dockers, CI/CD pipelines

SOFT SKILLS

Adaptability
Analytical Thinking
Collaboration
Problem Solving
Teamwork

PROFILE SUMMARY

- Highly focused professional with **over 5 years** of comprehensive experience in designing and developing **dynamic web applications** using **React.js, Vue.js, Next.js, and modern frontend frameworks.**
- Proficient in building scalable, maintainable, and high-performance **Single Page Applications (SPAs)** with strong expertise in state management tools such as **Redux, Redux-Saga, and React Query.**
- Skilled in implementing **Micro Front-end Architecture** and utilizing **TypeScript** to deliver robust, type-safe, and efficient codebases.
- Experienced **full-stack developer** with hands-on knowledge **of Node.js, Express, Nest.js**, and back-end API development using REST and GraphQL.
- Capabilities at **integrating complex third-party services** including payment gateways (Stripe, Shopify) and shipment tracking APIs, ensuring seamless user experiences and secure transactions.
- Knowledgeable in **cloud infrastructure management** and **DevOps practices**, including AWS, Azure, Docker containers, and automated CI/CD pipelines for continuous delivery.
- Strong background in **collaborating with cross-functional teams**—designers, product managers, and developers—to create user-centric interfaces with intuitive UX and responsive design using Chakra UI, Tailwind CSS, and Material UI.
- Proven capability to deliver **enterprise-grade solutions** in domains such as cloud automation (SaaS), e-commerce, event management, media processing, and AI-powered analytics platforms.

WORK EXPERIENCE

Feb'21 – Present: React.js Developer | SpineorWebservices Pvt. Ltd

Projects:

Concierto Cloud

Technologies: React.js, Redux, Redux-Thunk, Redux-Saga, Node.js, Azure, Python, Graphs.js, Tailwind CSS, Microservices Architecture

Description: Concierto Cloud is a zero-code SaaS platform designed to streamline and accelerate cloud adoption across AWS, Azure, GCP, and on-premises environments. Built on a Microservices Architecture, it offers modular, scalable cloud management solutions. The platform includes:

- Automated zero-code migration of applications, data, and infrastructure, thus reducing migration time and effort by up to **200%.**
- Simplified hybrid and multi-cloud operations with **600+** automation tasks, while improving productivity and cutting costs by up to **40%.**
- Provides advanced analytics & FinOps capabilities for cloud resource optimization and cost efficiency.

Key Result Areas:

- Developed React.js front-end applications utilizing Redux, Redux-Thunk, and Redux-Saga for effective state management.
- Created interactive dashboards with Graphs.js to deliver real-time cloud analytics and actionable insights.
- Designed and implemented Microservices Architecture to ensure modularity and scalability of the platform.
- Integrated Node.js back-end services with APIs to facilitate efficient multi-cloud operations management.
- Automated workflow to streamline cloud migration, management, and optimization processes.
- Built a ticket management system inspired by ServiceNow to enhance and simplify cloud service request management.

The Auto Part Shop

Technologies: Next.js, SCSS, Relay, GraphQL, Java, Scala, Node.js

Description: An extensive e-commerce platform distributing auto parts and accessories across 48 U.S. states, offering a catalog of over one million unique parts. The platform enables users to easily find and purchase car accessories.

Key Result Areas:

- Developed and maintained the front-end using Next.js and SCSS to deliver a seamless user experience.
- Collaborated with the internal team to enhance UI performance and improve accessibility standards.
- Built and optimized back-end services in Node.js to manage order processing and payment gateway integrations.
- Integrated GraphQL APIs to enable efficient data retrieval and enhance application performance.
- Enhanced scalability and security of the customer-facing user interface.

PERSONAL DETAILS

Date of Birth: 16th October 1999

Languages Known: English, Hindi, Punjabi

Landattend

Technologies: React.js, Stripe, APIs, Node.js, MongoDB, TypeScript, ElasticSearch

Description: A React.js-based platform for event booking and ticket sales that allows users to search for nearby events and securely purchase tickets via Stripe payment integration.

Key Result Areas:

- Acted as a Full Stack Developer, delivering scalable front-end solutions using React.js and TypeScript.
- Developed back-end services with Node.js & MongoDB to manage event data and user account management.
- Integrated Stripe API to enable secure and seamless payment processing.
- Optimized ElasticSearch queries to improve the speed and accuracy of event discovery.

Plus More

Technologies: React.js, Node.js, GraphQL, Redux

Description: An e-commerce platform specializing in bumpers and grilles, featuring a product review system that rewards customers for sharing feedback on their purchases.

Key Result Areas:

- Developed backend services to manage order processing, vendor communication, and inventory control.
- Integrated ShipStation API to provide real-time shipment tracking capabilities.
- Implemented GraphQL and Redux for efficient state management and optimized API data fetching.
- Ensured secure API integrations to protect customer orders and product review data.

Trans Load It

Technologies: Node.js, MediaElement.js, HTML5, CSS, JavaScript

Description: A Media Processing as a Service (MPaaS) platform enabling businesses to automate media workflows like video encoding, image resizing, and file conversion.

Key Result Areas:

- Developed RESTful APIs to manage media processing requests.
- Optimized video encoding and image resizing workflow to accelerate processing times.
- Implemented enhancements to security, scalability, and overall system performance.
- Researched and integrated MediaElement.js to enable seamless media playback.

Waste Management & Trucking Operations Platform

Technologies: React.js, Next.js, React Native, AWS Location Services, React DnD, NetSuite APIs, AWS Cloud

Description: Developed a multi-platform solution including an SEO-optimized website, a mobile app for drivers, and an internal dispatcher panel to streamline job assignments, real-time truck tracking, and operational workflows.

Key Result Areas:

- Built a performance-focused Next.js website to enhance the client's digital presence and SEO.
- Created a React Native mobile app enabling drivers to manage jobs, upload documents, and communicate in real time.
- Developed a React.js dispatcher dashboard with drag-and-drop job assignment and integrated AWS Location Services for live truck tracking.
- Integrated backend operations with NetSuite APIs and deployed the solution on AWS cloud for scalability and reliability.

Tricera

Technologies: Node.js (Backend), React.js (Frontend)

Description: An online photo and document editor offering tools for cropping, adjusting, and annotating images and PDFs, with integrated social logins and premium feature payments via Shopify.

Key Result Areas:

- Developed React.js frontend and Node.js back-end to enable seamless photo and PDF editing functionalities.
- Integrated REST APIs for social login, file storage, and third-party service connections.
- Managed Shopify payment gateway integration for premium feature access.
- Debugged and optimized application performance to ensure scalability and security.

Extrica

Technologies: React.js, TypeScript, Redux Toolkit, RTK Query, Material UI, Java, AI

Description: A cloud-native data mesh platform providing federated data ownership and real-time AI-driven analytics. It enables businesses to query and interact with data from diverse sources securely.

Key Result Areas:

- Developed front-end applications using React.js and TypeScript with Material UI and Redux Toolkit.
- Integrated RTK Query to optimize API data fetching and caching processes.
- Engineered GraphQL APIs to enable seamless federated data ownership across systems.
- Built back-end services leveraging Java and AI-powered analytics for advanced data processing.
